

**RAISINVILLE TOWNSHIP  
PROPOSED ZONING ORDINANCE AMENDMENT  
Ordinance No. 61-U; Date of Adoption: November 18, 2024**

*This document contains the amendments to the Raisinville Township Zoning Ordinance adopted by the Raisinville Township Board on November 18, 2024. Below is the full text of the proposed changes, including:*

*Text **in black** indicating the existing zoning ordinance language.*

*Text **in red and underlined** proposed to be added.*

*Text ~~**struck-through and highlighted**~~ proposed to be deleted.*

An Ordinance to amend Article 3 General Provisions of the Raisinville Township Zoning Ordinance in order to add regulations pertaining to large, commercial use solar energy systems. The Township adopts this Ordinance to render certain solar energy zoning regulations compatible with Public Act 233 of 2023 (“PA 233”), while retaining local control over matters of regulation that are not governed by PA 233, and to promote the public health, safety, and welfare of Township residents. This Ordinance also delineates the areas in the Township where these large commercial use solar energy systems are permitted.

**Section 1. Title**

This Ordinance shall be known as “Raisinville Township Zoning Ordinance Amendment No. 61-U.”

**Section 2. Amendment of Article 2 Definitions.**

Raisinville Township Zoning Ordinance, Article 2 Definitions is hereby amended by adding a definition for “Solar Energy System” in Section 2.01 Definitions to read as follows:

**Solar Energy System:**

**Small, Accessory Use:** A single residential or small business-scale solar energy conversion system (photovoltaic cell) designed and limited to generate power for onsite consumption consisting of roof, building-mounted or ground-mounted solar panels or arrays and associated control or conversion electronics, generating up to but not exceeding the manufacturer’s rating of one hundred (100) kilowatt (kW) and occupying two (2) acres of land or less as defined by the solar array area.

**Small, Commercial Use:** A utility-scale solar energy conversion system consisting of many ground-mounted solar arrays in rows, and associated control or conversion electronics with a capacity of two (2) megawatt (MW) or less and occupying ten (10) acres of land or less as defined by the fenced-in solar array area that will be used to produce electrical power to off-site customers. Said solar energy system may or may not be owned by the owners of the parcels upon which it is placed.

**Large, Commercial Use Not Under the Authority of PA 233:** A utility-scale solar energy conversion system consisting of many ground-mounted solar arrays in rows, and associated control or conversion electronics, with a capacity greater than two (2) megawatt (MW) and occupying more than ten (10) acres of land as defined by the fenced-in solar array area that will be used to produce electrical power to off-site customers. Said solar energy system may or may not be owned by the owners of the parcels upon which it is placed.

Large, Commercial Use Under the Authority of PA 233: A utility-scale solar energy conversion system consisting of many ground-mounted solar arrays in rows, and associated control or conversion electronics, with a nameplate capacity of fifty (50) megawatt (MW) or more and falling under the authority of PA 233 that will be used to produce electrical power to off-site customers. Said solar energy system may or may not be owned by the owners of the parcels upon which it is placed.

### **Section 3. Amendment of Article 3 General Provisions.**

Raisinville Township Zoning Ordinance, Article 3, Section 3.31 Solar Energy Systems is amended to read as follows:

#### **SECTION 3.31 SOLAR ENERGY SYSTEMS**

##### **1. General Requirements**

- A. The exterior surfaces of solar energy systems shall be generally neutral in color and substantially non-reflective of light. A unit shall be installed or located such that reflected solar radiation or glare shall not be directed onto adjacent building, properties or roadways.
- B. Solar energy systems must be installed in compliance with the National Electric Code, the manufacturer's specifications, and all other applicable codes. A copy of the manufacturer's installation and maintenance instructions must be submitted for review. Written evidence that utility company provider has been notified shall be submitted.
- C. Components of solar energy systems shall be approved by Solar Rating and Certification Corporation (SRCC), Electronic Testing Laboratories (ETL), or other similar certification organization if the similar certification organization is acceptable to the Township. Solar developer shall disclose all chemical and electronic components of solar panels and equipment to the Township including the use of batteries for storage. Any changes or modifications to components would be subject to special use and site plan amendment approval.
- D. A solar energy system shall be permanently and safely attached to the building, structure, or ground. Proof of the safety and reliability of the means of such attachment shall be submitted to the Building Official prior to installation.
- E. Solar energy systems, and the installation and use thereof, shall comply with the applicable construction codes and other Township, County, state and federal requirements.
- F. There shall be no signs on the unit, other than a sign or logo identifying the manufacturer with an area no greater than three (3) square feet and any necessary safety information signs.

## 2. Small Accessory Use Solar Energy Systems.

A. **Building Mounted Systems.** Building-mounted solar energy systems that generate up to but do not exceed the manufacturer's rating of one hundred (100) kilowatt (kW) to primarily meet the needs of on-site users shall be a permitted accessory use in all zoning districts, subject to the following requirements:

- i. Such unit may only be attached to a principal building, or an accessory building serving the principal use, such as a barn, garage or shed.
- ii. A roof-mounted unit on a sloped roof shall not project above the peak of the roof to which it is attached. When such units are mounted to a flat roof, they shall not project higher than three (3) feet above the building height and shall be screened with a wall at least one (1) foot taller than the unit. In no instance shall a roof-mounted unit exceed the maximum allowable height for the district as described in Article 12, Schedule of Regulations.
- iii. Roof-mounted panels that are integrated as the surface layer of the roof structure may be located on any part of the roof. Separate flush-mounted units may only be located on a rear- or side-facing roof.
- iv. Such unit shall be only of such weight as can safely be supported by the structure. Proof thereof, in the form of certification by a professional engineer or other qualified person shall be submitted to the Building Official prior to installation.
- v. A wall-mounted solar energy system shall not extend further than ten (10) feet from the building wall, may not extend into a required yard and may not exceed the height of the building wall to which it is attached. Such units may only be attached to one (1) side or rear building façade.

B. **Ground Mounted Systems.** Ground-mounted solar energy systems that generate up to but do not exceed the manufacturer's rating of one hundred (100) kilowatt (kW) to primarily meet the needs of on-site users shall be a permitted accessory use in all zoning districts, subject to the following requirements:

- i. Ground-mounted solar energy systems shall be permitted as an accessory use in all zoning districts as administratively approved through the issuance of a Building Permit if the application meets setback and other standards, as provided in this Section.
- ii. **Setbacks and Location.** Ground-mounted solar energy systems shall be located only in the non-required rear yard, or within the side yard provided the unit has a setback of not less than fifteen (15) feet.
- iii. **Height.** A ground-mounted solar energy system shall not exceed fifteen (15) feet in height, measured from the ground at the base of the unit.
- iv. **Size.** Ground-mounted solar energy systems may not occupy more than five (5) percent of the parcel upon which it is located up to one thousand five hundred (1,500) square feet.
- v. All power transmission lines shall be underground.

**3. Commercial Use Solar Energy Systems.**

- A. Purpose and Intent. The purpose and intent of this and subsequent subsections are to establish requirements for construction and operation of principal use solar energy system facilities and to provide standards for the placement, design, construction, monitoring, maintenance, modification and removal of solar facilities; address public safety; minimize impacts on scenic, natural, and historic resources; and provide adequate financial assurance for decommissioning.
- B. Small commercial use solar energy systems with a capacity of two (2) megawatt (MW) or less and occupying ten (10) acres of land or less as defined by the fenced-in solar array area are permitted in the AG, Agricultural District and the M, Manufacturing District with special approval in accordance with Article 13, Standards for Special Approval Uses. To minimize the impact of commercial use solar energy systems, the overall aggregate amount of land to be used by all small and large commercial use solar energy systems allowed within the Township shall be no more than 1,000 acres.
- C. Large commercial use solar energy systems Not Under the Authority of PA 233 with a capacity greater than two (2) megawatt (MW) and occupying more than ten (10) acres of land as defined by the fenced-in solar array area are permitted only in the M, Manufacturing District with special approval in accordance with Article 13, Standards for Special Approval Uses.
- D. In determining whether the commercial use solar facility is appropriate on the subject property, the Planning Commission and Township Board shall consider the following:
  - i. Proximity to existing electric transmission lines and feasibility of connecting to the existing transmission network.
  - ii. Existing physical features of the site that would be impacted by the solar facility, including wildlife impacts and other existing conditions.
  - iii. Potential impacts on neighboring properties in terms of glare, stormwater runoff, property values, environmental, aesthetics, and screening.
- E. Land located in the AG, Agricultural District on which small commercial use solar energy systems are proposed are required to maintain an agricultural dual use which may include the raising of crops, grazing of animals, and/or planting a groundcover that provides an ecosystem value.
- F. Commercial use solar facilities may not be developed on properties enrolled in the state Farmland and Open Space Preservation program (PA 116).

**4. Commercial Use Solar Energy System Standards.** Small and large commercial use solar system facilities shall be subject to the following standards:

- A. Lot Size: A small commercial use solar energy system shall be located on one or more parcels with an aggregate area of ten (10) acres or less as defined by the fenced-in solar array area. A large commercial use solar energy system may be located on one or more parcels with an aggregate area greater than ten (10) acres as defined by the fenced-in solar array area.
- B. Height. Commercial use solar energy system panels or collection devices shall not exceed fifteen (15) feet in height, excluding substation and electrical transmission equipment (as measured from the natural grade at the base of improvements). The maximum height for all structures associated with solar energy system shall comply with

the maximum height requirements for principal structures of the district in which they are located unless required by applicable code to interconnect into existing electric infrastructure or necessitated by applicable code to cross certain structures.

- C. Setbacks. Commercial use solar energy systems shall comply with the setback requirements of the district in which they are located, as measured from the property line or road right-of-way to the security fence enclosing the solar facility, with the following exception:
  - i. A minimum setback distance of one hundred (100) feet from road rights-of-way shall be required.
  - ii. A setback of five hundred (500) feet shall be required from the security fence enclosing the solar facility to the nearest existing residential dwelling unit of a non-participating landowner, school, or church.
  - iii. The solar facility is not subject to side or rear setbacks from common property lines of two or more participating parcels, except road right-of-way setbacks shall apply.
  - iv. Additional setbacks may be required to mitigate impacts on adjacent landowners such as noise and glare impacts, or to provide for designated road or utility corridors, as identified through the Special Land Use approval process.
- D. Land Clearing. Existing woodlots on proposed solar facility sites shall remain in their natural state. Land disturbance or clearing shall be limited to what is minimally necessary for the installation and operation of the facility.
- E. Screening. The perimeter of a commercial use solar facility shall be screened by a minimum twenty (20)-foot wide vegetative buffer placed outside of the perimeter security fence required under subsection G whenever existing natural vegetation does not otherwise completely obscure the solar energy system from adjacent properties, subject to the following requirements:
  - i. The landscape buffer shall be composed of naturalized groupings of plant materials, containing a mixture of Michigan native deciduous and evergreen trees and shrubs which would favor typical plant species found in Raisinville Township's woodlots. The landscape buffer shall provide a visual screen that is at least six (6) feet high. The applicant shall provide a landscape detail and cross-section demonstrating the screening /buffering achieved.
  - ii. If the applicant requests a Final Certificate of Occupancy from the Township and the applicant is unable to plant during the installation period, the Applicant will provide the Township with an irrevocable letter of credit, surety or corporate guarantee for an amount equal to one and one-half (1.5) times the cost of any planting deficiencies that the Township shall hold until the next planting season. After all plantings have occurred, the Township shall return the financial guarantee.
  - iii. All unhealthy (sixty (60) percent dead or greater) and dead material shall be replaced by the applicant within one (1) year, or the next appropriate planting period, whichever occurs first.
  - iv. Failure to install or continuously maintain the required vegetative buffer shall constitute a violation of this Ordinance and any Special Use Permit may be subject to revocation.

- F. Ground Cover.
- i. Ground around and under solar panels and in project landscape buffer areas shall be planted, established, and maintained for the life of the solar project in perennial vegetated ground cover.
  - ii. To the maximum extent feasible for site conditions, perennial vegetation ground cover shall be based on a diverse seed mix of native species consistent with guidance specific to the local area such as the Natural Resources Conservation Service.
  - iii. The owner/operator shall demonstrate site maintenance that is intended to remove invasive or noxious species and woody plants without harming perennial vegetation.
  - iv. Commercial use solar facilities that propose to install, establish, and maintain pollinator-friendly vegetative cover are to demonstrate the quality of their habitat by using guides or other third party solar-pollinator scorecards designed for Midwest ecosystems, soils, and habitat.
- G. Security Fence. A commercial use solar facility shall be completely enclosed by perimeter security fencing to restrict unauthorized access. Such fencing shall be seven (7) feet in height as measured from the natural grade of the fencing perimeter. The material of such fence shall be approved through the Site Plan review process. The fence shall be located around the perimeter of the solar facility and buffered as required under Subsection E. Lock boxes and keys providing a method for emergency gate access approved by the Township shall be provided at locked entrances for emergency personnel access. Electric fencing is not permitted.
- H. Lot Coverage: Commercial use solar facilities are exempt from maximum lot coverage limitations.
- I. Drainage. All existing on-site drain tiles and ditches shall be maintained. The application shall include a drainage plan prepared by a registered civil engineer showing how stormwater runoff will be managed and demonstrating that runoff from the site will not exceed the agricultural runoff rate or otherwise cause undue flooding or drainage issues. If detergents will be used to clean solar panels, details on the type of detergent, frequency and quantity of use, quantity and source of water, and stormwater quality protection measures shall be provided. Any necessary permits from outside agencies for off-site discharge shall be provided.
- J. Signage. No advertising or non-project related signs or graphics shall be on any part of the solar arrays or other components of the commercial use solar facility. This exclusion does not apply to entrance gate signage or notifications containing points of contact or all other information that may be required by authorities having jurisdiction for electrical operations and the safety and welfare of the public. Emergency contact information shall be provided at the entrance to the site and other locations as approved by the Township.
- K. Glare. Solar panels shall be placed such that solar glare shall not be directed onto nearby properties or roadways. Traffic safety shall be protected, and adjacent properties shall be protected from unreasonable glare. The applicant shall submit documentation to verify compliance with this section. When deemed appropriate, the Planning Commission may require a report from a registered civil engineer or other professional the Planning Commission finds to be qualified to address this issue.
- L. Lighting. All lighting for parking lots, driveways, external illumination of buildings, or the illumination of signs shall be directed away from and be shielded from adjacent

properties and shall be so arranged as to not adversely affect driver visibility on adjacent public roads in accordance with Section 3.24.

- M. Utilities. All collection lines and interconnections from the solar energy collection devices to any electrical substations shall be located and maintained underground inside the commercial solar facility, except in areas where technical or physical constraints make it necessary to install equipment above ground. This requirement excludes transmission equipment meant to connect the project substation to the local transmission system.
- N. Maximum Sound Level. No component of any commercial solar facility shall emit noise exceeding fifty-five (55) dB(A) as measured at the exterior property boundary or the existing right-of-way line.
- O. Conditions and Modifications. The Planning Commission and Township Board may, in addition to the above standards, recommend and/or require landscaping, walls, and other improvements or modifications that are reasonable in relation to and consistent with the nature of the application or adjacent land uses.

5. **Applications and Procedures.** In addition to the requirements of Article 13, Standards for Special Approval Uses and Article 14, Site Plan Review of the Raisinville Township Zoning Ordinance, all applications for small and large commercial use solar facilities shall include the following information.

- A. Pre-application meeting. Submittal of a concept plan and a pre-application conference with Township staff and officials is required to discuss the location, scale, and nature of the proposed use and what will be expected during that process. The concept plan shall meet the informational requirement for plot plans and include:
  - i. A description of the project.
  - ii. The location of the proposed facility site with property lines and setback lines.
  - iii. Existing and proposed buildings and structures including preliminary locations of the proposed solar panels and related equipment, fencing, driveways, and points of ingress/egress.
  - iv. Proposed connection to existing electric line.
- B. The Special Approval Use submittal shall include:
  - i. All property lot lines and dimensions, including a legal description of each parcel comprising the solar facility.
  - ii. Names of owners of each parcel that is proposed to be within the solar facility including proof that the applicant has authorization to act upon the owner's behalf.
  - iii. A list of all adjacent property owners, property identification numbers, and addresses.
  - iv. Identification of the utility company who will interconnect to the facility.
  - v. A narrative identifying the applicant, owner or operator, and describing the proposed solar facility project, including an overview of the project and its location, capacity of the solar facility, the approximate number of panels, representative types of and expected footprint of solar equipment to be constructed including the location of interconnections to any existing or proposed substations or connection stations.

- vi. An area map showing the proposed location of the solar facility, fenced area and driveways with the closest distance to all adjacent property lines and dwellings along with main points of ingress/egress, as well as the current use, zoning districts, and location of structures of all surrounding properties.

C. The Site Plan submittal shall include:

- i. Location and height of all proposed solar array(s), buildings, structures, electrical tie lines and transmission lines, security fencing, and all above-ground structures and utilities associated with the solar energy system.
- ii. Horizontal and vertical (elevation) to scale drawings with dimensions that show the location of the proposed solar array(s), buildings, structures, electrical tie lines and transmission lines, security fencing, internal drives and all above ground structures and utilities on the property (ies).
- iii. Location of all existing and proposed overhead and underground electrical transmission or distribution lines within the solar facility and within one hundred feet of all exterior property lines of the solar facility.
- iv. A description of the anticipated upgrades or improvements to the current electric grid that are required to support the proposed solar energy facility and the status of the applicant(s) application for interconnection to the grid.
- v. Proposed setbacks from the solar array(s) to all existing and proposed structures and property lines.
- vi. Land elevations for the solar array(s) location and the relationship to the land elevations of all existing and proposed structures within the solar facility at a minimum of 5 (five) -foot contours.
- vii. Access driveways within and to the solar facility, together with a detailed narrative regarding dimensions, composition, and maintenance of each proposed driveway. All access drives shall be subject to Monroe County Road Commission or MDOT approval as applicable and shall be planned so as to minimize the use of lands for that purpose.
- viii. Planned security measures to prevent unauthorized trespass and access during the construction, operation, removal, maintenance or repair of the solar energy system.
- ix. A Maintenance Plan providing a written description of the maintenance program to be used for the solar array and other components of the solar facility, as well as a Decommissioning Plan and performance security as noted in subsection F. The description shall include maintenance schedules, types of maintenance to be performed, and decommissioning and removal procedures and schedules if the solar energy system is decommissioned.
- x. Planned lightning protection measures.
- xi. A construction management plan which includes, but is not limited to, the location of staging areas for construction materials and equipment, hours of operation, estimated duration of construction, number and type of vehicles entering and leaving the site, including a traffic impact analysis of same, temporary lighting, anticipated noise and dust generation and corresponding mitigation measures.
- xii. Additional detail(s) and information as required by the Planning Commission and the Township Board to determine any potential impacts of the proposed facility. This may include but not be limited to the completed copy of the Michigan Pollinator

Habitat Planning Scorecard for solar Sites if applicable, a visual impact assessment (including visual simulations of the project to demonstrate appropriate mitigation measures), environmental impact analysis (baseline environmental assessment, historical sites, wildlife, threatened and endangered species, fragile ecosystems, etc.), a storm water impact study (storm water infiltration, 100-year rain event calculations, percolation tests, or other site specific soil information, etc.), a glare impact study, or other studies.

xiii. Any conditions and modifications approved by the Township Board as part of the Special Land Use review process shall be noted on the plans.

- D. Monitoring and Inspection. The Township shall have the right at any reasonable time, to provide a 24-hour notice to the Applicant to inspect the premises on which any commercial use solar facility is located. The Township may hire one or more consultants, with approval from the Applicant (which shall not be unreasonably withheld), to assist with inspections at the Applicant's or project owner's expense. Inspections must be coordinated with, and escorted by, the Applicant's operations staff at the commercial use solar energy facility to ensure compliance with the Occupational Safety and Health Administration (OSHA), NESC and all other applicable safety guidelines.
- E. Roads. Any material damages to a public road located within the Township resulting from the construction, maintenance or operation of a commercial use solar facility shall be repaired at the Applicant's expense. In addition, the Applicant shall submit to the appropriate county or state agency a description of the routes to be used by construction and delivery vehicles; any road improvements that will be necessary to accommodate construction vehicles, equipment or other deliveries. The Applicant shall abide by all County requirements regarding the use and/or repair of County roads.
- F. Maintenance and Repair: Commercial use solar energy facilities must be kept and maintained in good repair and condition at all times. If the Township Building Official determines that a commercial use solar energy system fails to meet the requirements of this Ordinance and the Special Use Permit, or that it poses a safety hazard, the Zoning Administrator/Building Official, or his or her designee, shall provide notice to the Applicant of the safety hazard. If, after a reasonable cure period (not to exceed seven (7) days), the safety hazards are not corrected, the Applicant is entitled to a hearing before the Township Board. If the Township Board determines that the safety hazard requires that the commercial use solar facility must be shut down, Applicant shall immediately shut down the solar facility and not operate, start or restart the solar energy system until the issues have been resolved. Applicant shall notify the Township of any solar panel damages or breakages and shall keep a maintenance log on the solar array(s), which shall be available for the Township's review within 48 hours of such request. Applicant shall keep all sites within the solar facility neat, clean and free of refuse, waste or unsightly, hazardous, or unsanitary conditions.
- G. Decommissioning and Reclamation.
- i. If the commercial use solar facility ceases to operate or is abandoned for a period of six (6) months or is deemed by the Building Official to be unsafe or not consistent with code, the Applicant shall repair and restore the system to good working order within a year or, if no longer operating or no longer in compliance with federal, state or local codes, it shall remove the system in its entirety. This shall include removing posts, equipment, panels, foundations and other items so that the ground is restored to its preconstruction state. The Applicant shall prepare a Decommissioning Plan and submit it to the Planning Commission for review and approval prior to issuance

of the Special Use Permit. Under this plan, all structures, concrete, piping, facilities, and other project related materials above grade and any structures up to three (3) feet below-grade shall be removed and taken offsite for disposal. The ground must be regraded and reseeded to as natural condition as possible.

- ii. **Performance Security.** Prior to the start of construction, the Applicant shall post a performance security (cash, irrevocable letter of credit, or surety bond deemed suitable by the Township attorney) in an amount deemed sufficient based on the cost of removal of the equipment, structures and foundations related to the commercial use solar energy system in the event of abandonment or failure to comply with federal, state or local laws (after being given reasonable time to remedy the problem). As a part of the Decommissioning Plan, the responsible party shall provide at least two (2) cost estimates from qualified contractors for full removal of the equipment, foundations, and structure associated with the facility as described above. The amounts will assist the Township in setting the performance security valid throughout the lifetime of the facility. The applicant shall provide documentation to support the estimated lifespan of the equipment. Bonds shall be extended on a bi-annual basis from the date of Special Use approval. Such financial security shall be irrevocable and non-cancellable. The Township may increase the insurance and/or bond amounts required of applicant in the event that it is determined by the Township Board, Attorney, Engineer, or an insurance bond professional that the existing surety and/or bond amounts are insufficient to affect the purposes of such guarantees. In the case of a sale of the commercial solar facility, the owner/operator is required to notify the Township, replace the financial security that have been provided and update the contact information for the new operator/owner.
  - iii. **Continuing Obligations.** Failure to keep any required financial security in full force and effect at all times while a commercial use solar facility exists or is in place shall constitute a material and significant violation of the Special Use Permit and this Ordinance, and will subject the facility Applicant, owner and operator to all remedies available to the Township, including any enforcement action, civil action, request for injunctive relief, and revocation of the Special Use Permit.
- H. **Application Escrow Account.** An escrow account shall be deposited with the Township by the Applicant when the Applicant applies for a Special Use Permit for a commercial use solar energy system. The monetary amount deposited by the Applicant in escrow with the Township shall be the amount estimated by the Township, to cover all reasonable costs and expenses associated with the Special Use Permit and Site Plan review and approval processes, which costs shall include, but are not limited to, reasonable fees of the Township Attorney, Township Planner and Township Engineer, as well as costs for any reports or studies that are reasonably related to the review process of the application. The Applicant shall have thirty (30) days to submit the amount estimated by the Township. Such escrow amount shall be in addition to any filing or application fees established by resolution. At any point during the Special Use Permit and Site Plan review processes, the Township may require that the Applicant place additional funds into escrow with the Township if the existing escrow amount deposited by the Applicant is deemed insufficient by the Township. If the escrow account needs replenishing and the Applicant refuses to do so within thirty (30) days, the Special Use Permit or Site Plan review process shall cease unless and until the Applicant makes the required additional escrow deposit. Any applicable zoning escrow Resolutions or other Ordinances adopted by the Township must also be complied with by the Applicant. The

Township shall provide a summary of all account activity to the Applicant within a timely manner upon request. Any funds remaining within the escrow after approval of the Special Use Permit and Site Plan shall be returned in a timely manner to the Applicant.

**6. Large Commercial Use Solar Energy Systems Under the Authority of PA 233.**

On or after November 29, 2024, once PA 233 of 2023 is in effect, in addition to the provisions of Subsections 1. through 5., the following provisions shall also apply to large commercial use solar energy systems with a nameplate capacity of fifty (50) megawatts or more. To the extent these provisions conflict with the provisions in Subsections 1. through 5. above (regulating solar energy facilities), the provisions below control as to such large commercial use solar energy systems. All provisions in Subsections 1. through 5. above that do not conflict with this subsection remain in full force and effect. This subsection does not apply if PA 233 of 2023 is repealed, enjoined, or otherwise not in effect, and does not apply to solar energy systems with a nameplate capacity of less than fifty (50) megawatts.

A. Setbacks. Large commercial use solar energy systems under the authority of PA 233 must comply with the following minimum setback requirements, with setback distances measured from the nearest edge of the perimeter fencing of the facility:

<b><u>Setback Description</u></b>	<b><u>Setback Distance</u></b>
<u>Occupied community buildings and dwellings on nonparticipating properties</u>	<u>300 feet from the nearest point on the outer wall</u>
<u>Public road right-of-way</u>	<u>50 feet measured from the nearest edge of a public road right-of-way</u>
<u>Nonparticipating parties</u>	<u>50 feet measured from the nearest shared property line</u>

B. Fencing. Fencing for the large commercial use solar energy systems under the authority of PA 233 must comply with the latest version of the National Electric Code as of November 29, 2024, or as subsequently amended.

C. Height. Solar panel components must not exceed a maximum height of twenty-five (25) feet above ground when the arrays are at full tilt.

D. Noise. Large commercial use solar energy systems under the authority of PA 233 must not generate a maximum sound in excess of fifty-five (55) average hourly decibels as modeled at the nearest outer wall of the nearest dwelling located on an adjacent nonparticipating property. Decibel modeling shall use the A-weighted scale as designed by the American National Standards Institute.

E. Lighting. Large commercial use solar energy systems under the authority of PA 233 must implement dark sky-friendly lighting solutions.

F. Environmental Regulations. Large commercial use solar energy systems under the authority of PA 233 must comply with applicable state or federal environmental regulations.

G. Host community agreement. The applicant shall enter into a host community agreement with the Township. The host community agreement shall require that, upon commencement of any operation, the large commercial use solar energy system owner must pay the Township \$2,000.00 per megawatt of nameplate capacity. The

payment shall be used as determined by the Township for police, fire, public safety, or other infrastructure, or for other projects as agreed to by the local unit and the applicant.

- H. Location. Large commercial use solar energy systems under the authority of PA 233 are permitted with special approval in the AG, Agricultural District and M, Manufacturing District in accordance with Article 13, Standards for Special Approval Uses. To minimize the impact of commercial use solar energy systems, the overall aggregate amount of land used for small or large commercial use solar energy systems allowed within the Township shall be no more than 1,000 acres.

#### **Section 4. Amendment of Article 4 AG, Agricultural District.**

Raisinville Township Zoning Ordinance, Article 4, Section 4.02 Uses Permissible on Special Approval is amended to read as follows:

20. Small, commercial use solar energy systems subject to the provisions of Section 3.31 of this Ordinance. To minimize the impact of commercial use solar energy systems, the overall aggregate amount of land used for small or large commercial use solar energy systems allowed within the Township shall be no more than 1,000 acres.
21. Large commercial use solar energy systems under the authority of PA 233, subject to the provisions of Section 3.31 of this Ordinance. To minimize the impact of commercial use solar energy systems, the overall aggregate amount of land used for small or large commercial use solar energy systems allowed within the Township shall be no more than 1,000 acres.

#### **Section 5. Amendment of Article 10 M, Manufacturing District.**

Raisinville Township Zoning Ordinance, Article 10, Section 10.02 Uses Permissible on Special Approval is amended to read as follows:

18. Small and large commercial use solar energy systems subject to the provisions of Section 3.31 of this Ordinance. To minimize the impact of commercial use solar energy systems, the overall aggregate amount of land used for small or large commercial use solar energy systems allowed within the Township shall be no more than 1,000 acres.

#### **Section 6. Repeal.**

All Ordinances in conflict with this Ordinance are to the extent of such conflict hereby repealed.

**Section 7. Severability.**

This Ordinance and the various parts, sentences, paragraphs, sections, subsections, phrases and clauses thereof are declared to be severable and if any of them are adjudged unconstitutional or invalid, it is hereby provided that the remainder of the Ordinance shall not be affected.

**Section 8. Effective Date.**

This Ordinance shall become effective seven (7) days after adoption and publication in a newspaper having general circulation in the Township of Raisinville, Monroe County, Michigan.
